

Carolyn Bennett, BSN, RN
Founder, Owner

Many times, during my forty plus years of working as a nurse I wondered where my varied experiences were leading me. The changes in health care, the confusing tests and diagnosis, and the intricate insurance issues combined with families and loved ones far away are some of the many reasons people fall through the cracks. Now, I know my years in healthcare provide me a strong background to give back to individuals and families that need a little independent support.

Healthmatch Mission

Sharing and caring are core values that drive Healthmatch Advocacy to help others. We put the pieces of the healthcare system together in a way that benefits you as an individual or family.

Help with obtaining and providing emotional support such as:

- Education concerning medical diagnosis/medications/options
- Assistance with understanding/making best benefit of insurance or other resources
- Smooth transitions in care
- Support and assistance in finding support

Healthmatch Advocacy

**Putting the
healthcare
pieces
together
is our goal**

Welcome to Healthmatch Advocacy!

- Professional Health Advocacy is a relatively new service. Hospitals, insurance companies and others often hire advocates, they may be called navigators, guides, or similar titles.
- Keep in mind the advocate must remain loyal to the person paying for the services.
- Healthmatch Advocacy contracts directly with its clients and is accountable only for your health needs. There are no middlemen or conflicting loyalties.

Services

Understanding Your Health/Diagnosis

Your health is related to your ability to understand, and use the information necessary to obtain adequate health care. We can help you achieve a full understanding of your health problem(s), diagnosis, and options.

Support

Fragmentation of healthcare occurs as our system focuses on parts of a person rather than the whole. Disease management works with a disease rather than the whole person experiencing the illness. Healthmatch nurses can support you in a holistic way by maximizing your coping resources.

Communication

Ineffective communication among healthcare personnel is a major factor in medical errors and harm. Healthmatch helps you organize and communicate with providers to facilitate exchange of your health history.

Successful Aging

A big challenge of aging is feeling you are living the life you deserve in the environment you desire. Healthmatch can help with evaluation of your health needs, safety, and ongoing medical issues. We focus on your well-being by developing mutual goals for your happiness and safety.

Services *(continued)*

Finances

Obtaining cost-effective health care can be a challenge. Excessive cost can be a barrier to needed care. We can help via:

- Review of medical plan to maximize coverage
- Strategizing to decrease out-of-pocket costs
- Assist with appeals to insurance
- Review medical bills for accuracy
- Assistance with resolution of outstanding medical bills
- Assistance with locating solutions to high prescription costs

Access to care

Healthmatch assists you in navigating the healthcare system via information about resources and benefits.

We can assist you with obtaining care, preventing problems, or identifying concerns early.

Your initial call is always free
